## 5 Instructions
### General Surface Prep

**USE CHEMICAL-RESISTANT GLOVES, such as nitrile, when handling product.**

### Application of Product

Surfaces should be clean, dry and free of all contamination. Place cartridge in standard caulking gun. Cut tip off nozzle on a slant to desired opening size and completely fill joints with caulk. Smooth with wet finger. Clean off excess caulk with soap and water before it cures. Do not apply when temperature falls below 50°F (10°C).

### Curing of Product

Minimum 24 hours before exposing to water. Cure time may be extended, depending on caulking thickness and ambient conditions.

### Cleaning of equipment

Clean tools with water before material dries.

Additional colors may be available in select markets.

See our color card for truest color representation when selecting or specifying a grout color. Final installed shade may vary with the tile type, color and porosity as well as jobsite conditions and finishing techniques. For best results, perform a test on a small, inconspicuous area or create a sample board prior to installation.
